Skills

Databases & Infrastructure: Relational (SQL Server, SQLite, PostgreSQL), Warehouse (Athena, BigQuery), Graph & NoSQL Structures, Orchestration

Cloud: AWS (Lambda, Glue, S3, CloudWatch), GCP, Cloudflare, Terraform

Analytics: ETL/ELT, dbt, SQL

Reporting & AI: MCP development, AI Data & Content Infrastructure, Agent Orchestration, Tableau, Power BI, and Emerging Tools

Languages & Tools: Python, SQL, JavaScript, Git

Business: Change Management, Stakeholder Communication, Project Management, Requirements Analysis

Experience

Enterprise Reporting Specialist, National Fish and Wildlife Foundation (Washington, DC | Jul 2024 - Present)

- Develops and manages a central data model with dbt, spanning multiple enterprise applications with 25+ marts.
- Innovates data governance practices with standardized data quality checks, a central data dictionary, and data lineage tracking.
- Collaborates in maintaining orchestrated ETL/ELT pipelines across enterprise systems (Accounting, EGMS, MS SQL Server, AWS).
- Designs and deploys AWS cloud infrastructure (using Terraform, Lambda, Glue, S3, CloudWatch) as a primary AI and data developer.
- Drives planning and project management of Enterprise AI strategy and engineers core AI infrastructure, including MCP servers, agent workflows, and indexed document libraries.
- Facilitates development and maintenance of reports, AI workflows, and data solutions across multiple departments including compliance, finance, and operations.

High Touch Operations Analyst, Cisco Systems (Herndon, VA | Jul 2020 - Jun 2024)

- Automated QBR metrics by pulling Salesforce API data to Excel via macros, eliminating manual export and preparation for weekly and quarterly reviews.
- Served as primary point of contact during technical escalations, coordinating between Cisco engineering and customer teams to accelerate solutions.
- Built dashboards to standardize reporting of service request SLAs and key support metrics.
- Leveraged strong customer relationships to improve service delivery and technical support value.

Analytics Developer Intern, Charter Communications (Maryland Heights, MO | May 2019 - Aug 2019)

- Built ETL pipelines connecting accounting data to Tableau dashboards, enabling directors to track spending activity and risk across software projects.

Education

B.S. in Statistics & Analytics, Computer Science, University of North Carolina at Chapel Hill (May 2020)
