Skills

Databases & Infrastructure: Relational (SQL Server, SQLite, PostgreSQL), Warehouse (Athena, BigQuery), Graph & NoSQL Structures, Pipeline Orchestration

Cloud: AWS (Lambda, Glue, S3, CloudWatch), GCP, Cloudflare, Terraform

Analytics: ETL/ELT, dbt, SQL, pandas

BI & AI: MCP development, AI Data & Content Infrastructure, Agent Orchestration, Tableau, Power BI, and Emerging Tools

Languages: Python, SQL, JavaScript

Business: Change Management, Stakeholder Communication, Project Management, Requirements Analysis

Experience

Enterprise Reporting Specialist, National Fish and Wildlife Foundation Jul 2024 - Present - Washington, DC

Develops and manages a central data model with dbt, spanning multiple enterprise applications with 25+ marts. Innovates data governance practices with standardized data quality checks, a central data dictionary, and data lineage tracking.

Collaborates in maintaining orchestrated ETL/ELT pipelines across enterprise systems (Accounting, EGMS, MS SQL Server, AWS).

Designs and deploys AWS cloud infrastructure (using Terraform, Lambda, Glue, S3, and CloudWatch) as a primary AI & data developer.

Drives both planning and project management of Enterprise AI strategy and engineers core AI infrastructure, including MCP servers, deterministic agent workflows, and indexed document libraries.

Trusted first point of contact for internal reports, AI workflows, and data solutions across multiple departments including compliance, finance, and operations.

High Touch Operations Manager, Cisco Systems Jul 2020 - Jun 2024 - Herndon, VA

Automated QBR metrics by pulling Salesforce API data to Excel via macro, eliminating manual export and prep for weekly and quarterly reviews.

Served as primary point of contact for AT&T during escalations, coordinating between Cisco engineering and customer network teams.

Built Jira dashboards tracking service request SLAs and support metrics across customer accounts.

Owned delivery presentation service health and Cisco network engineering support value.

Analytics Developer Intern, Charter Communications May 2019 - Aug 2019 - Maryland Heights, MO

Built an Alteryx pipeline connecting multi-source SQL accounting data to Tableau dashboards, enabling directors to track budget risk and flag excess spending across software projects.

Education

B.S. in Statistics & Analytics, Computer Science, University of North Carolina at Chapel Hill May 2020 - Chapel Hill, NC
