Skills

Cloud Platforms & Databases: AWS (Lambda, Glue, S3, CloudWatch), GCP, Cloudflare, Relational Databases (SQL Server), Data Warehouses (Redshift, BigQuery)

Analytics & AI: ETL/ELT, dbt, Model Context Protocol (MCP), Agent Orchestration, Tableau, Power BI

Languages & Tools: Python, SQL, JavaScript, Git, REST APIs, CI/CD, Terraform

Professional: Change Management, Stakeholder Communication, Project Management, Requirements Analysis

Experience

Enterprise Reporting Specialist, National Fish and Wildlife Foundation (Washington, DC | Jul 2024 - Present)

- Serves as primary developer for a central operations data model in dbt, deploying CI/CD workflows that sync data across enterprise applications, supporting data marts for 100+ users.
- Formalizes enterprise data governance practices by implementing standardized data quality tests, a central data dictionary, and data lineage tracking.
- Maintains orchestrated ETL/ELT pipelines across enterprise systems, collaborating with end users and other developers to ensure trusted downstream data access in Power BI, Tableau, and MCP integrations.
- Designs and deploys AWS cloud infrastructure (using Terraform, Lambda, Glue, S3, CloudWatch) as a primary AI and data developer.
- Drives Enterprise AI strategy and engineers core AI infrastructure, including an MCP Server, knowledge bases, and semantic modeling.
- Coordinates across multiple departments (including compliance, finance, and operations) to drive adoption, training, support, and innovation in reporting, AI products, and other data solutions.

High Touch Operations Analyst, Cisco Systems (Herndon, VA | Jul 2020 - Jun 2024)

- Automated QBR metrics by pulling Salesforce API data to Excel via macros, eliminating manual export and preparation for weekly and quarterly reviews.
- Served as primary point of contact during technical escalations, coordinating between Cisco engineering and customer teams to accelerate solutions.
- Built dashboards to standardize reporting of service request SLAs and key support metrics.
- Leveraged strong customer relationships to improve service delivery and technical support value.

Analytics Developer Intern, Charter Communications (Maryland Heights, MO | May 2019 - Aug 2019)

- Built ETL pipelines connecting accounting data to Tableau dashboards, enabling directors to track spending activity and risk across software projects.

Education

B.S. in Statistics & Analytics, Computer Science, University of North Carolina at Chapel Hill (May 2020)
